

STRUCTURAL, LLC

INTERNS WANTED ASAP

We are looking for hard-working students who are interested in the building industry. As an intern you will be part of our Design Team. A Designer at Structural, LLC is responsible for designing structural building wood-framing components such as manufactured roof/floor trusses, EWP/joists, and/or wall panels. Their duties include creating a layout from a set of construction plans, analyzing the components using engineering software, and coordinating the project from design to production. Some mathematics skills required for load calculations. Training is provided.
